Abstract

In the current global economic conditions, it can lead to very tight business competition. This will encourage company managers to improve corporate strategy. These activities relate to the company's efforts to maximize profits in the midst of very tight global economic competition. In addition, company management must also maximize the welfare of shareholders (shareholders). In fulfilling these objectives, it is necessary to make funding decisions and dividend decisions.

Keywords: Asset structure, Turnover of income, Cash, Capability of debt, Financial Posture
